

VCA PLATFORMS LLC

KEALAN SOURCE DEPENDENCY AND ACCESS RECORD

Technical Closing Record Supporting VCA-PLAT-015 and VCA-PLAT-016

Document ID: VCA-PLAT-018 | Status: Draft / Transaction Implementation Record

This document is part of the VCA Platforms LLC definitive transaction implementation package and is intended to implement the commercially agreed framework without independently expanding or renegotiating those terms.

1. PURPOSE AND SCOPE

This record documents the repositories, source components, third-party dependencies, deployment environments, accounts and access-control actions required to complete the technical transfer of Kealan to VCA Platforms LLC.

2. SOURCE INVENTORY

Material Kealan source repositories, directories, branches, releases, commit identifiers, snapshots and integrity hashes will be reconciled against VCA-PLAT-016. Each item will be classified as Acquired Kealan IP, Third-Party Dependency, Excluded BMV IP or Open Item.

3. DEPENDENCY REGISTER

Material models, APIs, libraries, frameworks, SaaS products, hosting, databases, authentication, storage, analytics and other external dependencies will be recorded with provider, purpose, account owner, licensing basis, transferability and operational responsibility.

4. ACCESS TRANSITION

Critical accounts will be transferred, re-provisioned or recreated under VCA Platforms-controlled access where commercially and technically practical. Passwords, tokens, API keys and other secrets will not be printed in the closing package.

5. DEPLOYMENT SNAPSHOT

The closing record will identify current deployment targets, environment configuration categories, databases, storage, domains/DNS and other operational systems required to continue Kealan after Closing.

6. CODEX TECHNICAL RECONCILIATION

Codex or comparable repository-analysis tooling may be used to generate file inventories, dependency manifests, architecture mappings and hash records. Automated output supports technical verification but does not independently determine legal ownership.

7. OPEN ITEMS AND EXCEPTIONS

Any missing source, unresolved ownership classification, non-transferable dependency, inaccessible account, incomplete credential transition or operational blocker will be specifically recorded and assigned a resolution status.

8. CLOSING STATUS

Status progression: DRAFT / TECHNICAL RECONCILIATION -> CONDITIONALLY ACCEPTED if open items remain -> VERIFIED / TRANSFER COMPLETE -> ACTIVE / VCA PLATFORMS CONTROLLED.
